# How to Use

Most school subjects can be taught to your whole family together, but some subjects are best taught individually so you can progress at the student's pace. This book of lesson plans contains suggestions and assignments for individual work for students in grade 5. Complete one lesson plan per day to finish these studies in a school year.

The lesson plans in this book cover language arts, science, and math.

## ***Language Arts***

Students will begin a study of the parts of speech as well as continue to progress in spelling, capitalization, punctuation, and English usage guidelines using the literary passages presented in *Spelling Wisdom, Book 2*, and the guided discovery lessons in *Using Language Well, Book 2*. The first half of these books will be covered this year; the rest will be completed in grade 6.

Written narration will be assigned to encourage your student to continue to progress in capturing his thoughts on paper and applying guidelines he has learned about English usage and mechanics. Rubrics and further instructions are provided in the *Using Language Well, Book 2, Teacher Guide and Answer Key*.

## ***Science***

Science can be done individually, or if you have more than one student in grades 1–6, they may all do one science course together. Simply Charlotte Mason has several to choose from.

Nature Study is an important part of science studies; be sure to include it. Follow the Nature Study suggestions in your selected science course or use the nature notebook, *Journaling a Year in Nature*, to guide your weekly study. Nature Study can be done all together as a family, but we have included reminders in these individual plans too.

## ***Math***

Use the math curriculum of your choice. These lesson plans will include reminders to work on it. As with other individual work, be sure to go at your student's pace.
