

Dear Parents,

Helping kids understand and apply mathematics knowledge and skills is a collective responsibility of parents, teachers, and principals.

Students need to learn mathematics in a way that will serve them throughout their lives. Understanding mathematics can provide our students with many job and career opportunities.

This is why students need to know why mathematics works the way it does, how to use it with confidence and competence when solving problems.

Understanding mathematics enables us to:

- Solve problems, make sound decisions and perform calculations with ease
- Explain how we solved a problem and why we made a particular decision
- Understand patterns and trends so that we can make predictions
- Understand Financial Literacy to manage time and money
- Handle everyday situations that involve numbers and feel confident

Before your child can learn mathematics, he or she needs to believe in his or her ability to do so. That's where you come in!

Parents, you are your child's first role model for learning. When you engage with your child in a supportive, relaxed atmosphere, your child will enjoy exploring the world of mathematics.

Dynamic Math is committed to helping parents and students. We understand that not everyone learns the same way, and not everyone feels the same about math. This is why we are continually working to create math resources that help students of all abilities, while supporting the many learning styles and varying levels of enthusiasm towards math.

From our clear concise instructions and straightforward guided examples to our additional practice material and tests, there's something to suit everyone. Combined with our video tutorials, students will be able to get a tutor-like experience from anywhere and at a fraction of the cost of standard tutoring or after-school help programs.

Table of Contents

BC Foundations and Pre-Calculus 10

	Page		Page
Unit 1 – Factors and Powers		Unit 5 – Multiplying Polynomials	
1.1 Multiples and Factors	2	5.1 Constant Terms, Coefficients, and Variables in Polynomial Expressions	166
1.2 Least Common Multiple and Greatest Common Factor	6	5.2 Addition and Subtraction of Polynomials	170
1.3 Powers and Exponents	11	5.3 Multiplying Polynomials by Monomials	172
1.4 Negative Exponents	13	5.4 Dividing Polynomials by Monomials	175
1.5 Laws of Exponents	15	5.5 Multiplying Polynomials	178
1.6 Solving Problems Using Exponents	20	Curriculum Competencies	183
Curriculum Competencies	22	Aboriginal Applications	184
Aboriginal Applications	23		
Unit 2 – Relationships		Unit 6 – Factoring Polynomials	
2.1 Graphs	28	6.1 Common Factors	189
2.2 Relations	32	6.2 Factoring Trinomials of the Form $x^2 + bx + c$	191
2.3 Representing Data Using Function Models	43	6.3 Factoring Trinomials of the Form $ax^2 + bx + c$	195
2.4 Defining a Function	47	6.4 Factoring the Difference of Squares	198
2.5 Domain, Range of a Function	52	6.5 Solving Quadratic Equations by Factoring	200
2.6 Determining Rules or Relationships in Data	58	Curriculum Competencies	204
2.7 Function Notation and Relations	66	Aboriginal Applications	205
Curriculum Competencies	73		
Aboriginal Applications	74		
Unit 3 – Linear Relations		Unit 7 – Trigonometric Ratios	
3.1 Arithmetic Sequences and Series	82	7.1 The Pythagorean Relationship	209
3.2 Graphing Arithmetic Sequences	91	7.2 The Trigonometric Ratios	214
3.3 Characteristics of a Linear Relation	93	7.3 Finding Sides and Angles of Triangles	218
3.4 Slope of a Line	99	7.4 Solving Problems Using Trigonometry	221
3.5 Slopes of Parallel Lines	103	7.5 Solving More Problems Using Trigonometry	224
3.6 Slopes of Perpendicular Lines	106	Curriculum Competencies	229
3.7 Graphing Using Tables of Values	109	Aboriginal Applications	230
3.8 Standard Form and Slope-Intercept Form	115		
3.9 Using the Slope-Intercept Form and Slope-Point Form	123	Unit 8 – Financial Literacy	
Curriculum Competencies	130	8.1 Salary	236
Aboriginal Applications	131	8.2 Wages	238
		8.3 Tips and Commissions	239
		8.4 Piecework	242
		8.5 Income Tax and Other Deductions	244
		Curriculum Competencies	245
		Aboriginal Applications	246
Unit 4 – Solving Systems of Linear Relations		Answers to Exercises and Unit Tests	250
4.1 Solving a System by Graphing	141		
4.2 Solving a System by Substitution	148		
4.3 Solving a System by Elimination	150		
4.4 Word Problems Involving 2 Equations in 2 Unknowns	153		
4.5 Problems Involving Systems of Equations	156		
Curriculum Competencies	160		
Aboriginal Applications	161
