37. Samantha bought a fish for \$5.25. She also bought some shrimps for \$11.80. She paid with a \$50 bill. How much change did she receive?

## Method 1:

I subtract \$5.25 and \$11.80 from \$50.

She received \$\bigsquare\$ change.

## Method 2:

First, I find the total amount of money Samantha spent.

She spent \$17.05 altogether.

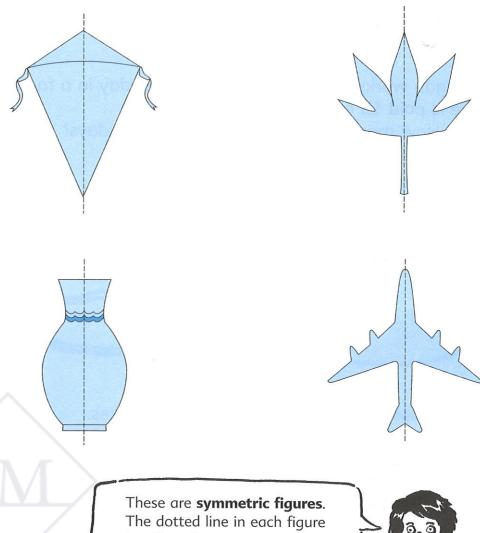

She received \$ change.

## **Symmetric Figures**

Many things around us have symmetry. Here are some of them.

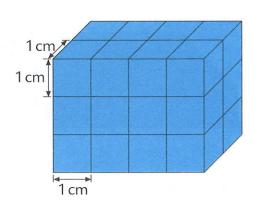

is a line of symmetry.

Look for some more examples of symmetry around you.

## Volume of a Cuboid

The cuboid is made up of 1-cm cubes.

 $4 \times 2 = 8$  There are 8 cubes in each layer.

$$8 \times 3 = 24$$

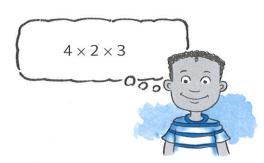

There are 24 cubes altogether.

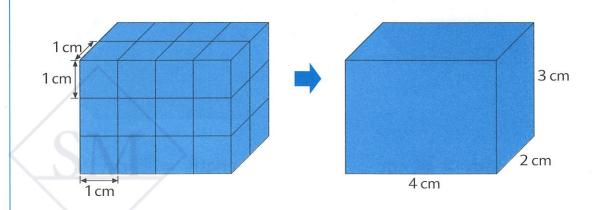

Its width is 2 cm.

Its height is 3 cm.

Its volume is  $\mathbf{cm}^3$ .

The cuboid measures 4 cm by 2 cm by 3 cm.

Volume of cuboid = Length  $\times$  Width  $\times$  Height
