

Then make a picture graph like this:

The picture graph shows the number of each type of toy.

How many balls are there?

How many more cars than dolls are there?

How many fewer cars than balls are there?

How many toys are there altogether?

$$5 + 5 + 5 = \square$$

$$3 \text{ fives} = \square$$

There are 5 pears in each group.

$$4 + 4 + 4 + 4 + 4 + 4 = \square$$

$$6 \text{ fours} = \square$$

There are 4 oranges in each group.

$$6 + 6 = \square$$

$$2 \text{ sixes} = \square$$

There are 6 pineapples in each group.

## 6 Subtraction Within 100

Subtract 2 from 48.

$$48 - 2 = \square$$

Count backwards 2 ones from 48:

47, 46

$$\begin{array}{r} 48 - 2 \\ \swarrow \quad \searrow \\ 40 \quad 8 \end{array}$$

Subtract 2 from 8.
