

Dear Parents,

Helping kids understand and apply mathematics knowledge and skills is a collective responsibility of parents, teachers, and principals.

Students need to learn mathematics in a way that will serve them throughout their lives. Understanding mathematics can provide our students with many job and career opportunities.

This is why students need to know why mathematics works the way it does, how to use it with confidence and competence when solving problems.

Understanding mathematics enables us to:

- Solve problems, make sound decisions and perform calculations with ease
- Explain how we solved a problem and why we made a particular decision
- Understand patterns and trends so that we can make predictions
- Understand Financial Literacy to manage time and money
- Handle everyday situations that involve numbers and feel confident

Before your child can learn mathematics, he or she needs to believe in his or her ability to do so. That's where you come in!

Parents, you are your child's first role model for learning. When you engage with your child in a supportive, relaxed atmosphere, your child will enjoy exploring the world of mathematics.

Dynamic Math is committed to helping parents and students. We understand that not everyone learns the same way, and not everyone feels the same about math. This is why we are continually working to create math resources that help students of all abilities, while supporting the many learning styles and varying levels of enthusiasm towards math.

From our clear concise instructions and straightforward guided examples to our additional practice material and tests, there's something to suit everyone. Combined with our video tutorials, students will be able to get a tutor-like experience from anywhere and at a fraction of the cost of standard tutoring or after-school help programs.

Table of Contents

Grade 4 Mathematics

	Page
Chapter 1 – Number Concepts	
1.1 Representing and Describing Whole Numbers	2
1.2 Comparing and Ordering Numbers	13
1.3 Representing and Classifying Numbers	21
Chapter 2 – Number Operations	
2.1 Addition and Subtraction of Numbers	31
2.2 Properties of 0 and 1 for Multiplication and Division	45
2.3 Rounding Numbers	49
2.4 Mental Mathematics	55
2.5 Multiplication of Numbers	58
2.6 Multiplication Using a Variety of Methods	66
2.7 Division of Numbers	71
Chapter 3 – Fractions and Decimals	
3.1 Fractions	89
3.2 Decimals and Relations with Fractions	95
3.3 Addition and Subtraction of Decimals	102
Chapter 4 – Patterns	
4.1 What is a Pattern?	115
4.2 Describing Patterns	119
4.3 Patterns in Tables, Charts and Graphs	122
4.4 Using Charts and Tables to Solve Problems	127
Chapter 5 – Variables and Equations	
5.1 Placeholders, Equations, and Word Expressions	143
5.2 Working with Story Problems	150
Chapter 6 – Measurement	
6.1 Time of Day	165
6.2 24-Hour Clock	171
6.3 Calendar Dates	176
6.4 Review of Length and Perimeter	180
6.5 Area of Shapes and Rectangles	186
Chapter 7 – Prisms and Lines of Symmetry	
7.1 Prisms and Other 3-D Objects	206
7.2 Solids and Nets	211
7.3 Lines of Symmetry	217
7.4 Symmetrical Shapes and Mirror Symmetry	221
Chapter 8 – Data Analysis	
8.1 One-to-One and Many-to-One Correspondence	232
8.2 Pictographs	236
8.3 Bar Graphs	244
Answers to Exercises and Chapter Tests	261
