
INTRODUCTION

Online Shopping tests reading, comprehension, and math skills while introducing students to the experience of shopping for various products online. Students will learn how to navigate a website to search for, choose, and order products from different companies.

The matching activity on page 27 will introduce students to the symbols and language of a website page selling a product. This activity can be completed before the students begin the rest of the activity pages. Each set of activity pages takes students through the step-by-step process of ordering a particular product.

The questions refer back to the information contained in the colorful graphic representations of website pages. These activity pages give students lots of practice interpreting the symbols and language of a shopping website.
