

CONTENTS

INTRODUCTION	7
GEOMETRY CONCEPTS IN PART 1	9
OVERVIEW OF LESSONS	11
SUPPLIES NEEDED	14
THE STUDY OF GEOMETRY	15
SOLIDS, SURFACES, AND LINES	17
Lesson 1—Solid Figures	17
Lesson 2—Points and Lines	20
Lesson 3—Intersecting Lines, Enclosing a Space	24
MEASUREMENT OF LINE SEGMENTS	27
Lesson 4—Estimating in Inches	27
Lesson 5—Recording Measurements and Errors in Measurements	32
Lesson 6—Estimating in Centimeters	37
Lesson 7—Measuring in Centimeters	41
CIRCLES	47
Lesson 8—Parts of a Circle	47
Lesson 9—Overlapping and Concentric Circles	50
Lesson 10—Bisecting a Line Segment	54
Lesson 11—Stepping off Distances	57
Optional Lesson—Creative Extra	61
Lesson 12—Exam I	62
ANGLES	63
Lesson 13—An Introduction to Angles	63
Lesson 14—Right Angles and Degrees	67
Lesson 15—Naming Angles, Equally Dividing a Semicircle	71
Lesson 16—Measuring Angles with a Protractor	73
Lesson 17—Drawing Angles with a Protractor	79
Lesson 18—Adjacent and Supplementary Angles	81
Lesson 19—Vertical Angles	83
Lesson 20—Copying an Angle	86
Lesson 21—Constructing Angles by Stepping Off	89
Lesson 22—Bisecting an Angle	91

Lesson 23—Angles Practice	94
Optional Lesson—Outdoor Geography	96
Lesson 24—Exam II.....	99
PARALLELS	101
Lesson 25—An Introduction to Parallels Using Set Squares	101
Lesson 26—Parallels and a Transversal	106
Lesson 27—Constructing Parallels	108
PERPENDICULARS	113
Lesson 28—Perpendiculars as a Bisector	113
Lesson 29—Perpendiculars Using Set Squares.....	116
Lesson 30—Constructing Perpendiculars Through a Point on the Line.....	120
Lesson 31—Constructing Perpendiculars Through a Point Not on the Line	126
Optional Lesson—Creative Extra.....	130
Optional Lesson—Outdoor Geography	132
TRIANGLES	133
Lesson 32—Sides of a Triangle	133
Lesson 33—Equilateral, Isosceles, and Scalene Triangles	136
Lesson 34—Angles of a Triangle.....	139
Lesson 35—Right, Obtuse, and Acute Triangles.....	142
Lesson 36—Exam III	144
GLOSSARY	147
REFERENCES	150
PRACTICAL GEOMETRY SOLUTIONS	151
