

Table of Contents

Review of Basic Geometry

Supplementary, Complementary, and Vertical Angles

The Point of Geometry

Corresponding, Alternate Interior and Alternate Exterior Angles

Properties of Equality and Congruence

The Formal Proof

Chapter 1 Test

Congruent Triangles

Altitude, Medians and Bisectors of a Triangle

More about Triangles

Right Triangles with and Altitude

Opposite vs. Adjacent

Sine

Cosine

Tangent

Chapter 2 Test

Quadrilaterals

Rhombus

Rectangle

Trapezoids

Area of Three- and Four-sided Shapes

Chapter 3 Test

Interior and Exterior Angles of a Polygon

Area of a Polygon

Chapter 4 Test

Circles

Interior Angles in a Circle

Congruent Circles

Exterior Angles Intercepting Circles

Intersecting Chords in a Circle

Simplifying Radicals

Arc Length Proportion

Area of a Circle, Sector and Circle Segment

Volume

Chapter 5 Test

Final Test
