

1. Write the place value of the underlined digit.
a) $562 \underline{3} 6$
tens
b) $\underline{1} 956336$ $\square$
c) $8 \underline{2} 56601$

d) 7103256
e) $25 \underline{8} 9143$

f) $3 \underline{9} 21052$

g) $903 \underline{7} 46$

h) 2605416

2. Underline the digit 5 in the number. Write the place value of the digit 5 in the number.
a) $3 \underline{5} 689$

b) 5308603
c) 36905 $\square$
d) 512

e) 2542

f) 3451628 $\square$
g) 43251

h) 152776

i) 1543001

j) 5704021 $\square$ k) 7305

I) 9695000 $\square$
3. Write the number into the place value chart.
a) 2316953
b) 62507

| Millions | Hundred <br> Thousands | Ten <br> Thousands | Thousands | Hundreds | Tens | Ones |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

The number 784523 is a six-digit number.

- The digit 7 stands for 700000 -the value of the digit 7 is 700000 .
- The digit 8 stands for 80000 -the value of the digit 8 is 80000 .
- The digit 4 stands for 4000 -the value of the digit 4 is 4000 .
- The digit 5 stands for 500 -the value of the digit 5 is 500 .
- The digit 2 stands for 20 -the value of the digit 2 is 20 .
- The digit 3 stands for 3 -the value of the digit 3 is 3 .

4. Write the value of each digit.
a) 654872

b) 128537

5. What does the digit 7 stand for in the number?
a) 8476
b) 38725

c) 93726

d) 730025

e) 7250

f) 64297

g) 43075

h) 382457

6. Fill in the blank.
a) In the number 4523 , the digit 5 stands for $\qquad$ .
b) In the number 34528 , the digit 3 stands for $\qquad$ .
c) In the number 420583 , the value of the digit 8 is $\qquad$ .
d) In the number 723594 , the digit $\qquad$ is in the ten thousands place.

BONUS - In the number 2709 926, the digit 2 stands for $\qquad$ and $\qquad$ -

Number words for the tens place: ten twenty thirty forty fifty sixty seventy eighty ninety
7. Say whether the underlined digits represent thousands or millions.
a) $\underline{327} 510210$ millions
b) $216 \underline{772} 015$
c) $\underline{5} 321859$ $\qquad$
d) $879 \underline{054} 815$ $\qquad$ e) $\underline{129} 000307$ $\qquad$ f) $2 \underline{500} 623$ $\qquad$
8. Write the value of the underlined digits.
a) $\underline{375} \mathbf{2} 31872$ three hundred seventy-five million
b) $287 \underline{036} 253$ $\qquad$
委 c) 79253812
\$d) $3 \underline{770} 823$
*e) $22 \underline{306} 235$
9. Write numerals for the number words.
a) Seventy-three million, fifty-seven thousand, one hundred four
b) Nine hundred seven million, four hundred three thousand, twenty-one
10. Write number words for the numerals.
a) 275381210
b) 89023100
c) 998325593
\$11. Write how many years ago each period started, using words and then numerals. (Note: "mya" means millions of years ago.)

12. a) Write the distance from each planet to the sun using words.
b) The distance from Earth to the moon is 384400 km . Write this distance using words.
c) Billions come after millions.

| Planet | Distance from Sun (km) |
| :---: | :---: |
| Mercury | 57600000 |
| Venus | 107520000 |
| Earth | 148640000 |

The planet Neptune is 4468640000 km from the sun. Write this number in words.
\$13. Blood contains different kinds of cells. There are about 225000000 red blood cells, 335000 white blood cells, and 12800000 platelets in a drop of blood. Write the numbers of different blood cells in words.

## NS6-2 Representation in Expanded Form

1. Write the number in expanded form. Then draw a base ten model.

Example: $3152=3000+100+50+2$

a) $4354=$ $\square$
b) $2604=$ $\square$
2. Write the number in expanded form using numerals and words.
a) $2536784=\underline{2}$ millions +5 hundred thousands +3 ten thousands +6 thousands
+7 hundreds +8 tens +4 ones
b) $6235401=$ $\qquad$
c) $3056026=$ $\qquad$
3. Write the number in expanded form using numerals.
a) $72613=70000+2000+600+10+3$
b) $36=$ $\qquad$
c) $12052=$ $\qquad$ d) $526=$ $\qquad$
e) $56384=$ $\qquad$ f) $2493=$ $\qquad$
g) $3082385=$ $\qquad$
h) $9340042=$ $\qquad$
4. Write the number for the expanded form.
a) $6000+700+40+5=$ $\qquad$
b) $800+60+8=$ $\qquad$
c) $3000+30+2=$ $\qquad$ d) $50000+6000+400+90+3=$ $\qquad$
e) $30000+2000+500=$
f) $90000+3000+600+8=$ $\qquad$
g) $70000+700+7=$ $\qquad$ h) $10000+6000+200+30+4=$ $\qquad$
i) $4000000+300000+20000+7000+800+50+2=$ $\qquad$
j) $2000000+300000+2000+30+2=$ $\qquad$
BONUS $+300000+2000000+20000+70000+200=$ $\qquad$
5. Find the missing numbers.
a) $2000+600+$ $\qquad$ $+5=2645$
b) $4000+200+$ $\qquad$ $+5=4285$
c) $40000+3000+$ $\qquad$ $+10+5=43715$
d) $80000+5000+$ $\qquad$ $+60+3=85263$
e) $20000+6000+300+$ $\qquad$ $=26302$
f) $\qquad$ $+400=9400$
g) $6000+$ $\qquad$ $=6080$
h) $80000+$ $\qquad$ $+$ $\qquad$ $=87005$
i) $300000+90000+$ $\qquad$ $+$ $\qquad$ $=390702$
j) $\qquad$ $+300000+10000+500+$ $\qquad$ $=7310540$
k) $9000000+$ $\qquad$ +50000 + $\qquad$ $+800+$ $\qquad$ $=9458803$
6. How many thousands blocks would you need to represent a million? $\qquad$
7. In the number 38562 , what is the sum of the tens digit and the thousands digit?
8. a) How many two-digit numbers have digits that add to 12 ?
b) How many two-digit numbers have digits that add to 10 ?
c) How many two-digit numbers have digits that add to 8 ?
9. Using only 5 base ten blocks, make (or draw) a model of a number such that...
a) the number is odd.
b) there are twice as many thousands blocks as hundreds blocks.
10. Represent the number 3564 in four different ways.

- by sketching a base ten model
- in words
- in expanded form (2 ways)

## NS6-3 Comparing and Ordering Numbers

1. Write the number in expanded form. Then complete the sentence.
a) $725=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $735=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$
b) $723=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$
$\qquad$ is greater than $\qquad$ 725 . $623=$ $\qquad$ $+$ $\qquad$ $+$
$\qquad$
$\qquad$ is greater than $\qquad$ .
c) $463=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$ d) $309=$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $462=$ $\qquad$ $+$ $\qquad$ $+$ $319=$ $\qquad$ $+$ $\qquad$ $+$
$\qquad$ is greater than $\qquad$ . $\qquad$ is greater than $\qquad$ .
2. Circle the digits that are different in the pair of numbers. Then write the greater number in the box.
a) $\begin{array}{llll}5 & 4 & 9 \\ 5 & 4 & 9\end{array}\left(\begin{array}{l}3 \\ 2\end{array} 7_{7}^{7}\right.$
b) 954103
956103
c) 2532119 2532109
d) 450186214 450186224
54937

3. Reading from left to right, circle the first digits that are different in the pair of numbers. Then write the greater number in the box.
a) $\left.\begin{array}{r}6415 \\ 64\end{array} \quad 15 \begin{array}{l}8 \\ 9\end{array}\right)_{7}^{3}$
b) 523714
527314
c) 324371
d) 16237
424611
16227
641597

" $5>3$ " means " 5 is greater than 3 " and " $3<5$ " means " 3 is less than 5 ." The signs $>$ and $<$ are called inequality signs.
4. Write the correct inequality sign ( $>$ or $<$ ) in the box.
a) $5392 \square 5246$
b) 23172 $\square$ 23157
c) 323728 323729
d) $6000 \square 5999$
e) $152719 \square 152620$
f) $52305 \square 61302$
g) $3289 \square 10104$
h) $2351052 \square 2351049$
i) 15327 $\square$ 15232
j) $7214 \square 18932$
k) 382636 $\square$ 382522
I) 2627382

5. Create the greatest possible four-digit number using the digits given. Only use each digit once.
a) $4,3,2,6$ $\qquad$ b) $7,8,9,4$ $\qquad$ c) $0,4,1,2$
$\qquad$
6. Create the greatest possible number using these digits. Only use each digit once.
a) $3,4,1,2,8$ $\qquad$ b) $2,8,9,1,5$
c) $3,6,1,5,4$
$\qquad$
7. Use the digits to create the greatest number, the least number, and a number in between.
a)

| Digits |  |  |  | Greatest Number | Number in Between | Least Number |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 8 | 5 | 7 | 2 | 1 |  |  |  |
| 2 | 1 | 5 | 3 | 9 |  |  |  |
| 3 | 0 | 1 | 5 | 3 |  |  |  |

8. Arrange the numbers in order, starting with the least number.
a) $32573352 \quad 3183$
b) 17251
17385
17256
$\qquad$ , $\qquad$ , $\qquad$
$\qquad$ , $\qquad$ , $\qquad$
c) 87500
87498
87499
, $\qquad$
$\qquad$ - , $\qquad$
d) $36725 \quad 3281$
93859
e) $60052 \quad 60001 \quad 60021$
$\qquad$
$\qquad$
$\qquad$
f) $273 \quad 5891$

17
$\qquad$
, $\qquad$ , $\qquad$
$\qquad$ , $\qquad$ , $\qquad$
g) 23809,45789 001, 423010
h) 648973 902, 973902 648, 902648973
\$i) 301298456,42907 812, 329 564, 789234502
母j) 72 572, 572000,572000 572, 57200 572, 572572
9. Using the digits $0,1,2,3,4$, create a number greater than 32000 and less than 34000 .
10. Using the digits $3,5,6,7,8$, create an even number greater than 85000 and less than 87000 .
11. Which digit is covered by the black square?
a) $32675<32 ■ 56<32854$
b) $68379<68$ ■ $32<68464$
c) $999999<\square 233458<2000000$
d) $223789021>22 ■ 935784>222934567$

## NS6-4 Addition and Subtraction

1. Write the numbers in expanded form. Then add the place values and regroup.
a) 473 $\qquad$ hundreds + $\qquad$ tens + $\qquad$ ones hundreds + $\qquad$ tens + $\qquad$ one hundreds + $\qquad$ tens + $\qquad$ ones
Regroup: hundreds + $\qquad$ tens + $\qquad$ ones
b) $\begin{array}{r}3418 \\ +2945\end{array}$
$\square$
thousands + $\qquad$ hundreds + $\qquad$ ten + $\qquad$ ones

# $+2945$ 

 thousands + $\qquad$ hundreds + $\qquad$ tens + $\qquad$ onesRegroup: $\qquad$ thousands + $\qquad$ hundreds + $\qquad$ tens + $\qquad$ ones thousands + $\qquad$ hundreds + $\qquad$ tens + $\qquad$ ones
2. Add. You will need to regroup.
a)

b) $\qquad$

I)

Sometimes you need to regroup several times. When subtracting $6423-3746$, regroup 1 ten as 10 ones, 1 hundred as 10 tens, and 1 thousand as 10 hundreds.

Example:
Step 1
Step 2
Step 3

Step 4

| $\begin{array}{ll}11 & \\ 3 & y\end{array}$ |  |  | 13 |
| :--- | :--- | :--- | :--- |
| $A 4$ |  | $\not 2$ |  |
| 3 | 7 | 4 | 6 |
|  | 7 | 7 |  |

1311 $\begin{array}{llll}5 & \text { \& } \\ 1\end{array} 13$

Step 5
1311
9. Subtract, regrouping two or three times.
a)
b)
c)
d)

|  | 8 | 9 | 2 | 9 |
| :---: | :---: | :---: | :---: | :---: |
| - | 4 | 9 | 5 | 8 |
|  |  |  |  |  |

|  | 8 | 7 | 2 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| - | 4 | 9 | 5 | 8 |
|  |  |  |  |  |

|  | 6 | 4 | 3 |
| ---: | ---: | ---: | ---: |
| 7 |  |  |  |
| - | 2 | 6 | 7 |
|  | 8 |  |  |
|  |  |  |  |

|  | 4 | 5 | 6 | 3 |
| :---: | :---: | :---: | :---: | :---: |
| - | 1 | 7 | 9 | 5 |
|  |  |  |  |  |

10. Subtract. Regroup when necessary.
a)
d)
b)
c)

e)
f)

|  | 4 | 0 | 8 | 5 | 9 | 1 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| - |  | 2 | 3 | 7 | 8 | 4 |
|  |  |  |  |  |  |  |

|  | 1 | 0 | 0 | 0 | 0 | 0 | 0 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| - |  | 7 | 8 | 3 | 6 | 0 | 8 |
|  |  |  |  |  |  |  |  |

|  | 1 | 0 | 1 | 0 | 1 | 0 | 1 |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| - |  |  | 3 | 4 | 5 | 6 | 7 |
|  |  |  |  |  |  |  |  |

11. a) File Data1.PDF contains 6497 KB of data. File Data2.PDF contains 4378 KB of data. How much data is in both files together?
b) The Falcon 9 rocket consists of two parts called stages. Stage 1 weighs 25600 kg and its fuel weighs 395700 kg . Stage 2 weighs 3900 kg and its fuel weighs 92670 kg . What is the combined mass of both stages and the fuel?
12. a) The Nile River is about 6690 km long and the Amazon River is about 6440 km long. How much longer is the Nile River than the Amazon River?
b) Mars has two moons, Phobos and Deimos. The average distance from Mars is 9378 km for Phobos and 23459 km for Deimos. How much farther from Mars on average is Deimos?
13. The table shows the shoreline length of the Great Lakes. Use the information in the table to answer the questions.
a) How much longer is the shoreline of Lake Superior than Lake Ontario?
b) Which is longer, the combined shoreline length of Lake Superior, Lake Erie, and Lake Ontario or the combined shoreline length of Lake Huron and Lake Michigan? How much longer?

| Lake | Shoreline <br> Length $(\mathbf{k m})$ |
| :---: | :---: |
| Superior | 4393 |
| Huron | 6164 |
| Michigan | 2639 |
| Erie | 1402 |
| Ontario | 1146 |

c) The total shoreline length of Canada is 202080 km . Which is longer, the total shoreline length of Canada or of the Great Lakes? How much longer?
d) Make your own addition and subtraction questions using the information in the table. Calculate the answers.

## NS6-5 Rounding

1. Draw an arrow to the 0 or 10 to show whether the circled number is closer to 0 or 10 .
a)

b)

c)

d)

2. a) Which one-digit numbers are closer to 0 ? $\qquad$
b) Which one-digit numbers are closer to 10 ? $\qquad$
c) Why is 5 a special case? $\qquad$
3. For the circled number, draw an arrow to show which multiple of 10 you would round to. Then round the number to the nearest 10.
a)

Round to: $\quad 10$
b)

Round to: $\qquad$
$\qquad$
c)

Round to: $\qquad$
4. Circle the correct answer.
a) 29 is closer to: 20 or 30
b) 14 is closer to: 10 or 20
c) 254 is closer to: 250 or 260
d) 488 is closer to: 480 or 490
5. Draw an arrow to show whether the circled number is closer to 0 or 100 .
a)

b) $<\begin{array}{lllllllllll}<1 & 1 & 1 & 1 & 1 & 1 & 1 & 1 & 1 & 1 & 1 \\ 0 & 10 & 20 & 30 & 40 & 50 & 60 & 70 & 80 & 90 & 100\end{array}$
6. Is 50 closer to 0 or to 100 ? Why is 50 a special case?
7. Circle the correct answer.
a) 80 is closer to: 0 or 100
b) 20 is closer to: 0 or 100
c) 40 is closer to: 0 or 100
d) 60 is closer to: 0 or 100
8. Show the approximate position of the number on the line. What multiple of 100 do you round to?
 (627)
a) 627
b) 683
c) 795
d) 706
Round to $\qquad$ Round to $\qquad$ Round to $\qquad$ Round to $\qquad$
9. Circle the correct answer.
a) 165 is closer to: 100 or 200
b) 635 is closer to: 600 or 700
c) 870 is closer to: 800 or 900
d) 532 is closer to: 500 or 600
10. Draw an arrow to show whether the circled number is closer to 0 or 1000 .

11. Circle the correct answer.
a) 100 is closer to: 0 or 1000
b) 900 is closer to: 0 or 1000
c) 600 is closer to: 0 or 1000
12. Draw an arrow to show which multiple of 1000 you round to.

13. Circle the correct answer.
a) 2953 is closer to: 2000 or 3000
b) 7293 is closer to: 7000 or 8000
c) 5521 is closer to: 5000 or 6000
d) 8232 is closer to: 8000 or 9000
14. Write a rule for rounding a four-digit number to the nearest thousand.
15. Underline the digit you want to round to. Look at the next digit. Do you round up or down?
a) thousands

b) ten thousands

| 6 | 8 | 4 | 1 | 1 |
| :--- | :--- | :--- | :--- | :--- | | round up |
| :---: |
| round down |

c) hundreds

| 7 | 4 | 5 | 0 | 8 |
| :--- | :--- | :--- | :--- | :--- |
| round up |  |  |  |  |
| round down |  |  |  |  |

d) tens

e) thousands

| 1 | 9 | 6 | 7 | 8 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- |

f) thousands

| 3 | 0 | 0 | 5 | 2 | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\begin{array}{l}\text { round up } \\ \text { round down }\end{array}$ |  |  |  |  |  |

Step 1: Round the underlined digit up or down.

To round up, add 1 to the digit. To round down, keep the digit the same.
hundreds

Step 2: The digits to the right of the rounded digit become zeros.

The digits to the left remain the same. hundreds

| 4 | 5 | 7 | $\underline{3}$ | 2 | 5 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 4 | 5 | 7 | 3 | 0 | 0 | up down

16. Round to the indicated place value.
a) thousands

| 1 | 0 | $\underline{0}$ | 7 | 2 | 3 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 0 | 1 | 0 | 0 | 0 |

c) hundreds

| 3 | 1 | 7 | 2 | 2 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| up |  |  |  |  |  |
|  |  |  |  |  |  |
| down |  |  |  |  |  |

e) tens

| 3 | 8 | 5 | 7 | 2 | 0 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
| up |  |  |  |  |  |  |
| down |  |  |  |  |  |  |

b) ten thousands

d) hundred thousands

| 2 | 1 | 5 | 9 | 3 | 2 | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| up |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
| down |  |  |  |  |  |  |

f) hundred thousands

| 6 | 6 | 7 | 8 | 9 | 5 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
| up |  |  |  |  |  |  |
| down |  |  |  |  |  |  |

Sometimes in rounding you have to regroup.
Example: Round 37952 to the nearest hundred.

| 3 | 7 | $\underline{9}$ | 5 | 2 |
| :--- | :--- | :--- | :--- | :--- |
|  |  | 10 |  |  |

Round 9 hundreds up to 10 hundreds.

Regroup the 10 hundreds as 1 thousand. Add it to the 7 thousands to make 8 thousands.

BONUS - Round the number, regrouping if necesary.
a) 395721 to the ten thousands
b) 427296 to the tens
c) 20963 to the hundreds

## NS6-6 Estimating in Addition and Subtraction

Mathematicians use the sign $\approx$ to mean approximately equal to.

1. Estimate the sums and differences by rounding to the nearest hundreds or thousands.
a)

b) $390 \longrightarrow$

c) $\begin{aligned} & 6301 \rightarrow \square \\ &-1708 \rightarrow-\square \\ & \square\end{aligned}$
d)

e)

f) $5610 \longrightarrow$ $+7240-$

g) $941-463 \approx$ $\qquad$
h) $1267+5679 \approx$ $\qquad$
i) $5232-2854 \approx$ $\qquad$
2. a) Estimate the difference in $1875-1532$ by rounding to the nearest thousand.
b) Estimate the difference in $1875-1532$ by rounding to the nearest hundred. $\qquad$
c) Which method makes more sense in the estimation? Explain. $\qquad$
$\qquad$
d) Circle the place value to which you will round each number when estimating the difference.
i) $34509-34243$
ii) $123456-90389$
iii) $875234-672092$
iv) $45681-43902$

The leading digit is the leftmost digit of the number. The leading digit of 51 and 567890 is 5 .
3. Estimate. Then add or subtract. Hint: Which digit will you round to? It may not be the leading digit.
a) $273572+675215 \approx$ $\qquad$

c) $80278-42325 \approx$ $\qquad$ |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
| - |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

b) $20273-15723 \approx$ $\qquad$
$\qquad$

d) $1275382+5385273 \approx$ $\qquad$ |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| + |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

4. Follow the instructions to find the answer to the addition. Write the answer in the table below.
a) Estimate the answer by rounding the numbers to the leading digit.
b) Estimate the answer by rounding one number up and the other number down.

Round to the leading digit.
c) Estimate the answer by rounding both numbers up to the leading digit.
d) Calculate the actual answer.

| Part | $3456+2391$ | $32901+44789$ | $372987+573004$ | $64870+28705$ |
| :---: | :---: | :---: | :---: | :---: |
| a) | 5000 |  |  |  |
| b) | 6000 |  |  |  |
| c) | 7000 |  |  |  |
| d) | 5847 |  |  |  |

e) Circle the estimates from parts a), b), and c) that were closest to the actual answer in part d).
f) Which way of estimating works best for addition? Explain. $\qquad$
$\qquad$
$\qquad$
5. Follow the instructions to find the answer to the subtraction. Write the answer in the table below.
a) Estimate the answer by rounding the numbers to the leading digit.
b) Estimate the answer by rounding one number up and the other number down. Round to the leading digit.
c) Estimate the answer by rounding both numbers up to the leading digit.
d) Calculate the actual answer.

| Part | $3456-2391$ | $52901-44789$ | $882987-573004$ | $64870-28705$ |
| :---: | :--- | :--- | :--- | :--- |
| a) |  |  |  |  |
| b) |  |  |  |  |
| c) |  |  |  |  |
| d) |  |  |  |  |

e) Circle the estimates from parts a), b), and c) that were closest to the actual answer in part d).
f) Which way of estimating works best for subtraction? Explain.
$\qquad$
$\qquad$
6. A supermarket sold 472 apples, 783 oranges, 341 pears, and 693 bananas. How many pieces of fruit in total did the supermarket sell? Use estimation to check your solution. Explain your estimation strategy.
7. Round 628315 to the nearest...

$\qquad$ b) hundred $\qquad$
c) thousand $\qquad$ d) ten thousand $\qquad$
e) hundred thousand $\qquad$ BONUS - million $\qquad$
8. Luc is planning a trip from Sydney, NS, to Vancouver, BC. If he drives through Canada, the distance is 6032 km , which takes 63 hours to drive. If he drives through the United States, the distance is 6392 km , which takes 60 hours to drive. Luc plans to drive to Vancouver through Canada and return through the United States. What is the total distance Luc plans to drive? Estimate to check your answer.
9. An almanac lists the populations of Nova Scotia and PEI as 923600 and 143000. The numbers are rounded to the same digit. What digit are these numbers rounded to? Explain.
10. Rick calculated $45780+23451=89$ 231. Is Rick's answer correct? Use estimation to check.
11. Use the information in the table to answer the question. Then estimate to check your answer.
a) What is the total area of Manitoba and Saskatchewan?
b) How much larger is the area of Ontario than the area of British Columbia?
c) Make your own addition and subtraction questions using the information in the table. Calculate the answers.

| Province | Area (km²) |
| :---: | :---: |
| Alberta | 661848 |
| British Columbia | 944735 |
| Manitoba | 647797 |
| Ontario | 1076395 |
| Saskatchewan | 651036 |

## NS6-7 Integers

The height above sea level and the depth below sea level are recorded on a scale that includes zero (0), positive whole numbers ( $1,2,3, \ldots$ ), and negative whole numbers $(-1,-2,-3, \ldots)$.

1. a) Write an integer for the level at which each animal typically flies or swims.

b) Which animal swims above the other, the dolphin or the mackerel?

One integer is greater than another if it is

- higher up on a vertical number line or - farther right on a horizontal number line.

The inequality sign > means "is greater than" and < means "is less than."
c) Write an integer inequality to show your answer in part b): $\qquad$ $<$ $\qquad$

Integers that are greater than 0 are called positive integers. Integers that are less than 0 are called negative integers.
Positive integers are sometimes written with a " + " sign in front. Example: 3 can be written as 3 or +3 , but -3 is only written as -3 .
2. Label the following numbers on the number line with their letters.
B. 3
E. 6
G. -7
L. -5
O. -3

3. Write the integer on the number line.
a) -3
b) +3
c) -4
d) +7
e) -2
f) -5

4. Circle the greater integer in the pair. Hint: Use the number line from Question 2.
a) -3 or +5
b) +7 or -2
c) +8 or +3
d) -5 or -4
5. a) Circle the integers on the number line: $\begin{array}{lllllll}3 & -4 & -8 & -1 & 7\end{array}$

b) Order the integers you circled from least to greatest.
$\qquad$
$\qquad$ $<$ $\qquad$
$\qquad$
$\qquad$
6. Write $<$ (is less than) or $>$ (is greater than) in the box.
a) $+3 \square+7$
b) $-5 \square+4$
c) $+7 \square-2$
d) $-4 \square-6$
7. Put the integers into the boxes in order, from greatest to least.
$+5,-3,+10,-7,-2 \quad \longrightarrow \quad \square>\square>\square>\square>\square$
8. Use any of the number lines above to answer the question.
a) How many negative integers are greater than (to the right of) -4 ? $\qquad$
b) What are 3 integers that are less than -5 ? $\qquad$ , $\qquad$ , $\qquad$
c) How many integers are between -4 and +2 ? $\qquad$
d) Which integers are closer together, -3 and +3 or -4 and +4 ? $\qquad$

Temperature is also recorded using integers. We use degrees Celsius $\left({ }^{\circ} \mathbf{C}\right)$ to measure and record temperature.
9. Write "warmer" or "colder," then write $>$ or $<$ to show your answer.
a) $+3^{\circ} \mathrm{C}$ is $\qquad$ than $-4^{\circ} \mathrm{C}$, so +3 $\square$
b) $-5^{\circ} \mathrm{C}$ is $\qquad$ than $-2^{\circ} \mathrm{C}$, so $-5 \square-2$.
c) $-3^{\circ} \mathrm{C}$ is $\qquad$ than $-6^{\circ} \mathrm{C}$, so -3 $\square$ -6 .

10. The graph shows the average temperature on the planets in our solar system.
a) What is the warmest average temperature?

About $\qquad$ ${ }^{\circ} \mathrm{C}$
b) What is the coldest average temperature? About $\qquad$ ${ }^{\circ} \mathrm{C}$

BONUS - What is the difference between the coldest average temperature and the warmest average temperature?

About $\qquad$ ${ }^{\circ} \mathrm{C}$

11. The temperature in Calgary, Alberta, was $-8^{\circ} \mathrm{C}$ on Monday and $-11^{\circ} \mathrm{C}$ on Tuesday.

Which day was warmer?

Integers can be used to describe quantities having opposite directions from a given point.
Examples: temperatures above (+) and below (-) zero, golf scores above (+) and below (-) par, hours ahead of $(+)$ or behind $(-)$ London, UK.
12. Write an integer to represent the quantity.
a) A temperature of fifty-two above zero
b) A depth of two hundred meters below sea level $\qquad$
c) A golf score of 5 shots above par $\qquad$
d) A height of three hundred metres above sea level $\qquad$
e) 5 hours behind London, UK $\qquad$

When two integers are the same distance from 0 , but in opposite directions, they are called opposite integers. Example: +3 and -3 are opposite integers.

1. Use the number line above to write the opposite integer.
a) +4 $\qquad$ b) -2 $\qquad$ c) +5
d) -1

The opposite of an integer has the same whole number part, but the opposite sign (+ or - ).
Example: The opposite of -100 is +100 .
2. The opposite of 429 is $\qquad$ .
3. Circle the number that is closer to 0 .
a) -3 or -7
b) 3 or 7
c) -2 or +5
d) +2 or -5
4. Label each integer on the number line with its letter. What do the letters spell?
N. the opposite of -6
O. halfway between +1 and +5
U. halfway between -1 and -5
K. an equal distance from +4 and -4
Y. on the same side of 0 as -3 , but twice as far from 0 as -3

5. The integer 0 is halfway between...
a) -2 and $\qquad$ b) -5 and $\qquad$ c) -12 and $\qquad$ d) -573 and $\qquad$
6. a) Use the number line to compare the positive numbers and their opposite negative numbers. Write $<$ or $>$.

i) $2 \square 5$ and $-2 \square-5$
iii) 3
 1 and
 $-1$
ii) $4 \square 3$ and

iv) $2 \square 4$ and $-2 \square-4$
b) Predict using the pattern from part a): since $235<246$, then $-235 \square-246$.

BONUS $~$ What integer is equal to its opposite? Explain.

REMINDER - Two integers are opposite integers if they are the same distance from 0 but in opposite directions.
If you can compare positive integers, you can compare their opposite negative integers too.
Example: 32 is less than 500 , so -32 is greater than -500 .
7. Compare the positive integers, then compare the negative integers.
a) $+5421 \square+5432$
b) $+25453 \square+23674$
c) $+7000 \square+5982$ so $-25453 \square-23674$
so $-7000 \square-5982$
d) 13000

e) 72516
 75216 so $-72516 \square-75216$
f) $+30407 \square+3407$
8. Compare the negative integers by imagining their opposite positive integers.
a) $-652 \square-1538$
b) $-809417 \square-796583$
c) $-6000 \square-40000$
9. Do you need to compare the numbers 38 and 27 to compare -38 to +27 ? $\qquad$ Explain. $\qquad$
10. Write "greater than" or "less than" in the blank.

A negative integer is always $\qquad$ a positive integer.
11. Compare the integers. Write $<$ or $>$.
a) $-200 \square 100$
b) $750 \square-4000$
c) $-800 \square-1000$
d) $-6000 \square 5000$
e) $72413 \square-5000$
f) $+853416 \square+872503$
g) $751602 \square 83917$
h) $-615893 \square-1000000$
i) $-983417 \square 785392$
j) $-62953 \square 304502$
k) $-621419 \square+583742$
I) $-8217354 \square-8216493$
12. Use the digits 4, 5, 6, and 7 to create the number.
a) the greatest integer possible
b) the least integer possible
c) the greatest negative integer possible
d) a number between -6456 and -6576
