Where Does Trash Go?

People make a lot of trash.
A truck picks the trash up.

Most trash goes to a
landfill. Machines dig dirt
to cover the trash.

This truck is picking up trash
to take to the landfill.

The landfill can get full. When the landfill is full, where
will the trash go? You can help by making less trash.

This machine is moving around trash in a landfill.

“Where Does Trash Go?”—Think About It

1. What is a *landfill*? How do you know?

2. Write one fact you know about landfills.

3. What does each picture show?

4. What can you do to make less trash? Put a ✓.

Use both sides of paper.

Give clothes that do not fit you to smaller kids.

Save leftover food for snacks.

5. Draw a picture of what you do to make less trash.

Fish Facts

Fish live in the water.

Fish live in lakes, ponds, rivers, and oceans.

Fish swim in the water.

Fish flap their fins and tail to swim.

Their fins and tail make them move.

Some fish are flat.

Other fish are round.

Some fish are long and thin.

Sharks are fish.

Tuna are fish, too.

A shark

“Fish Facts”—Think About It

1. Where do fish live?

2. How do fish move?

3. Would you like a pet fish? Why or why not?

4. Tuna are fish. Circle the correct answer.

A. TRUE

B. FALSE

5. Draw a fish.

Describe the fish.
