

Dear Parents,

Helping kids understand and apply mathematics knowledge and skills is a collective responsibility of parents, teachers, and principals.

Students need to learn mathematics in a way that will serve them throughout their lives. Understanding mathematics can provide our students with many job and career opportunities.

This is why students need to know why mathematics works the way it does, how to use it with confidence and competence when solving problems.

Understanding mathematics enables us to:

- Solve problems, make sound decisions and perform calculations with ease
- Explain how we solved a problem and why we made a particular decision
- Understand patterns and trends so that we can make predictions
- Understand Financial Literacy to manage time and money
- Handle everyday situations that involve numbers and feel confident

Before your child can learn mathematics, he or she needs to believe in his or her ability to do so. That's where you come in!

Parents, you are your child's first role model for learning. When you engage with your child in a supportive, relaxed atmosphere, your child will enjoy exploring the world of mathematics.

Dynamic Math is committed to helping parents and students. We understand that not everyone learns the same way, and not everyone feels the same about math. This is why we are continually working to create math resources that help students of all abilities, while supporting the many learning styles and varying levels of enthusiasm towards math.

From our clear concise instructions and straightforward guided examples to our additional practice material and tests, there's something to suit everyone. Combined with our video tutorials, students will be able to get a tutor-like experience from anywhere and at a fraction of the cost of standard tutoring or after-school help programs.

Table of Contents

Grade 8 Mathematics

	Page		Page
Chapter 1 – Number Concepts		Chapter 7 – Tessellations	
1.1 Rational and Irrational Numbers	2	7.1 Drawing Tessellations	177
1.2 Two and Three Term Ratios	7	7.2 Transformations of Tessellations	183
1.3 Percent	11		
1.4 Square Root Concept	17	Chapter 8 – 3-D Objects and 2-D Shapes	
1.5 Square Roots and Calculators	20	8.1 Isometric Dot Paper	201
1.6 Rates	23	8.2 3-Dimension Rod Designs in 2- Dimensions	205
1.7 Scientific Notation	27		
Chapter 2 – Number Operations		Chapter 9 – Presentation of Data	
2.1 Operations with Fractions	35	9.1 Questions for Investigation, Using Existing Data	219
2.2 Operations with Decimals, Integers, and Other Radicals	52	9.2 Appropriate Methods of Collecting Data	221
2.3 Rate, Ratio and Proportion	70	9.3 Displaying Data	223
2.4 Percent Problems	72	9.4 Advantages and Disadvantage of Types of Graphs	229
Chapter 3 – Patterns		9.5 Misrepresentation and Misinterpretation of Data	235
3.1 Variables and Relations	82	Chapter 10 – Probability	
3.2 Graphing with Tables of Values	89	10.1 Probability of an Independent Event	245
3.3 Translating Between Written and Algebraic Expressions	92	10.2 Probability of Two Independent Events	248
3.4 Generalizing Patterns and Problem- Solving	95		
Chapter 4 – Equations		Answers to Exercises and Chapter Tests	254
4.1 First-Degree Equations	104		
4.2 First-Degree Equations: Different Forms	108		
Chapter 5 – Problem Solving			
5.1 Using Diagrams to Solve Problems	125		
5.2 Finding Relationships	129		
5.3 Organizing Information	133		
5.4 Interpreting Results	137		
Chapter 6 – Measurement			
6.1 The Pythagorean Relationship	144		
6.2 Areas and Perimeters of Quadrilaterals and Circles	149		
6.3 Areas of Composite Figures	155		
6.4 Volume of Solid Objects	161		
6.5 Surface Area and Volume of a Prism	164		
6.6 Surface Area and Volume of a Cylinder	169
